- Lightspeed K20 server equipped with NVidia K20M GPU now support the following GPU drivers:
  - NVidia V320.78
  - NVidia V332.50
  - NVidia V354.56 (download)
- Lightspeed K80 server equipped with NVidia K80M GPU now support the following GPU drivers:
  - NVidia V341.44
  - NVidia V354.56 (download)

Update instructions

NVidia V354.56 Driver Installation instructions:

1) Download the NVidia V354.56 Installer (download - 354.56-tesla-desktop-winserver2008-2012r2-64bit-international-whql.exe)
2) Run the installer
3) During installation choose the "*Custom*" option instead of express
4) Check the box for "*Clean Installation*"
5) Proceed with all default options as they appear.
6) Step through the installer until complete.
7) Upon completion Reboot the server.
