

# INSPECT 2110

Vigilantly Guards Your IP Media Networks for Flawless Content Delivery

Making the transition to IP and ST 2110 comes with its own unique challenges. INSPECT 2110 is designed to help ensure a smooth and seamless migration. Working diligently in the background, INSPECT 2110 automatically scans for any anomalies and promptly alerts you upon detecting any issues. Its monitoring-by-exception approach delivers an efficient troubleshooting process. This allows you to prioritize your operational tasks without requiring constant network supervision.

## Advantages of INSPECT 2110:

- Ideal for use in broadcast, sports, and mobile live production
- Provides extensive production oversight such as audio levels, picture display, and ancillary data monitoring
- Automates the detection of PTP-related issues
- Allows alarms to be fully configured for specific requirements
- Enables remote access monitoring and control from anywhere
- Offers in-depth signal diagnostics via one-click PRISM integration
